Dynamic OSGi application using Equinox.
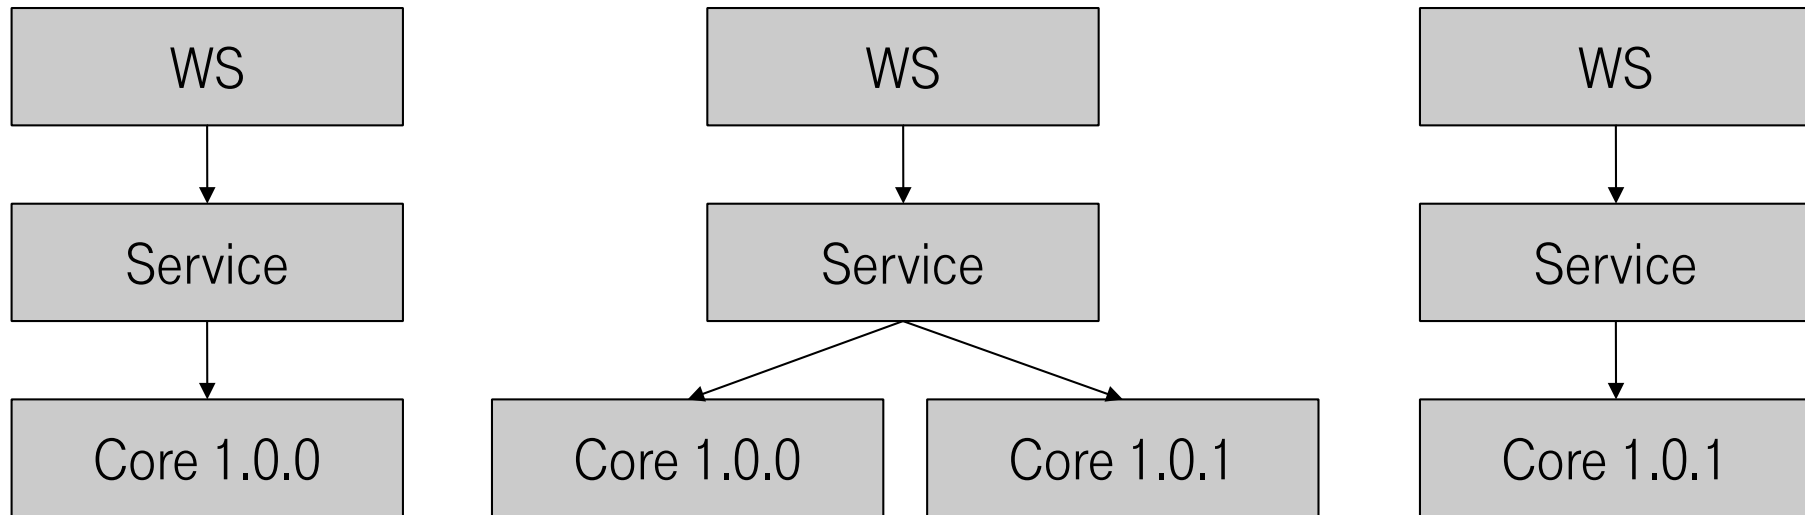

Eclipse Demo Camp Walldorf, May 19th 2009

Jochen Hiller, j.hiller@telekom.de
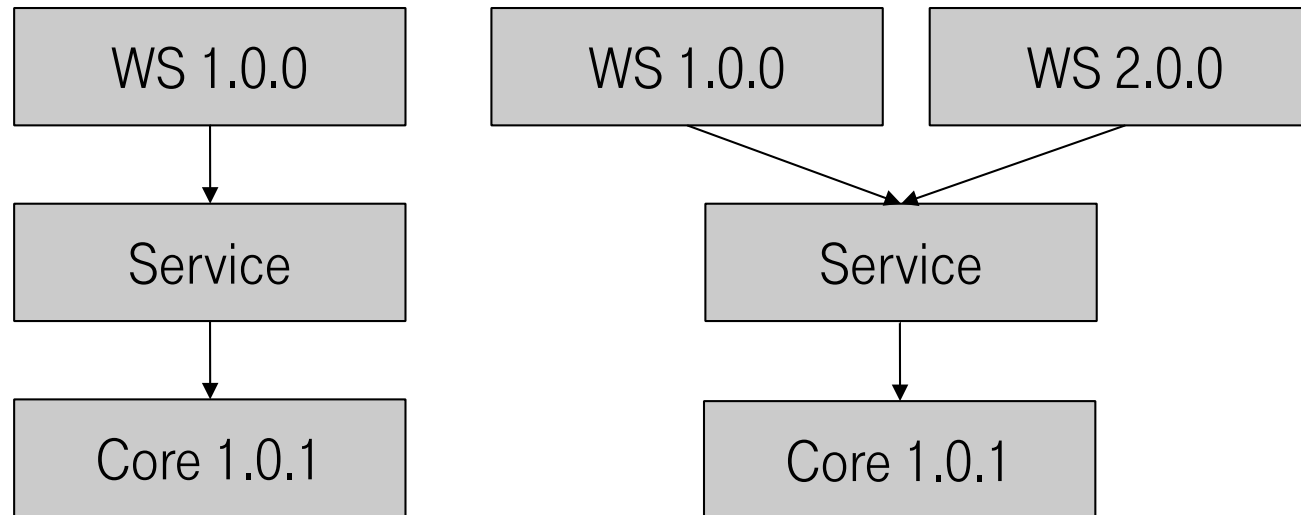

Dr. Frank Gerhardt, fg@gerhardtinformatics.com

The Plot 1/2

- We install and run a bug-fixed version 1.0.1 of the core MOTD bundle
- The web service picks up the new service implementation when Core 1.0.0 is stopped

The PIot 2/2

- We add new functionality in version 2.0.0 of the webservice at runtime
- Can select category with new URL, e.g. http://localhost/motd/ v2/2009-05-19/work
