## Notes

### Guest participant: Johannes Schmitz from CARIAD

CARIAD participated to get an overview of the activities of the working group and within the simopenpass project. Especially the architecture of the MantleAPI and usage of the OpenSCENARIO 1 engine have been discussed. CARIAD is also evaluating joining the working group and potentially contributing to the projects.

### Introduction of supporting colleagues on Mercedes side (Mercedes)

Delayed again.

### Mantle API as project

Postponed due to lack of time. In general topics like dependency management shall be discussed. These topics will also be discussed in the requirement refinement on OpenSCENARIO Engine and MantleAPI.

### GUI

In the last workshop some questions regarding further development of the GUI came up, e.g.:

- Does a separate repository make sense?
- How to handle versioning for the GUI and compatibility with the openPASS simulation core?

Postponed to next meeting.

### Documentation of Requirement Refinement Meetings
