Java Workflow Toolbox (JWT)
KickOff meeting: Introduction

Marc Dutoo (Open Wide, FR)
Florian Lautenbacher (University of Augsburg, DE)

Agenda

- Some words about our proposal
- Description of the creation review
- Summary about JWT
    - WE
    - Desktop
    - WAM
- Overview about the KickOff meeting
- Some rules for the KickOff meeting

Some words about our proposal

- Took more than one year
  - Change of project leader at Open Wide
  - New sponsorng organisations, partners and funding (SCoRWare partners, Bull, JBoss, TIBCO, University of Augsburg, etc.)
  - Other partners gone (Shanghai University, Beijing University)
  - But the vision stays the same!
- Purpose
  - Provide build time and run-time tools to help develop processes
  - No particular focus on a specific engine implementation or standard (even if standards will be promoted) : need for an independent process meta model definition
  - No constrained graphic representation but BPMN will be targeted at first. Motivations are to be able to give to different user profiles different representation of the same workflow definition. E.g. : simplified view for business oriented users.
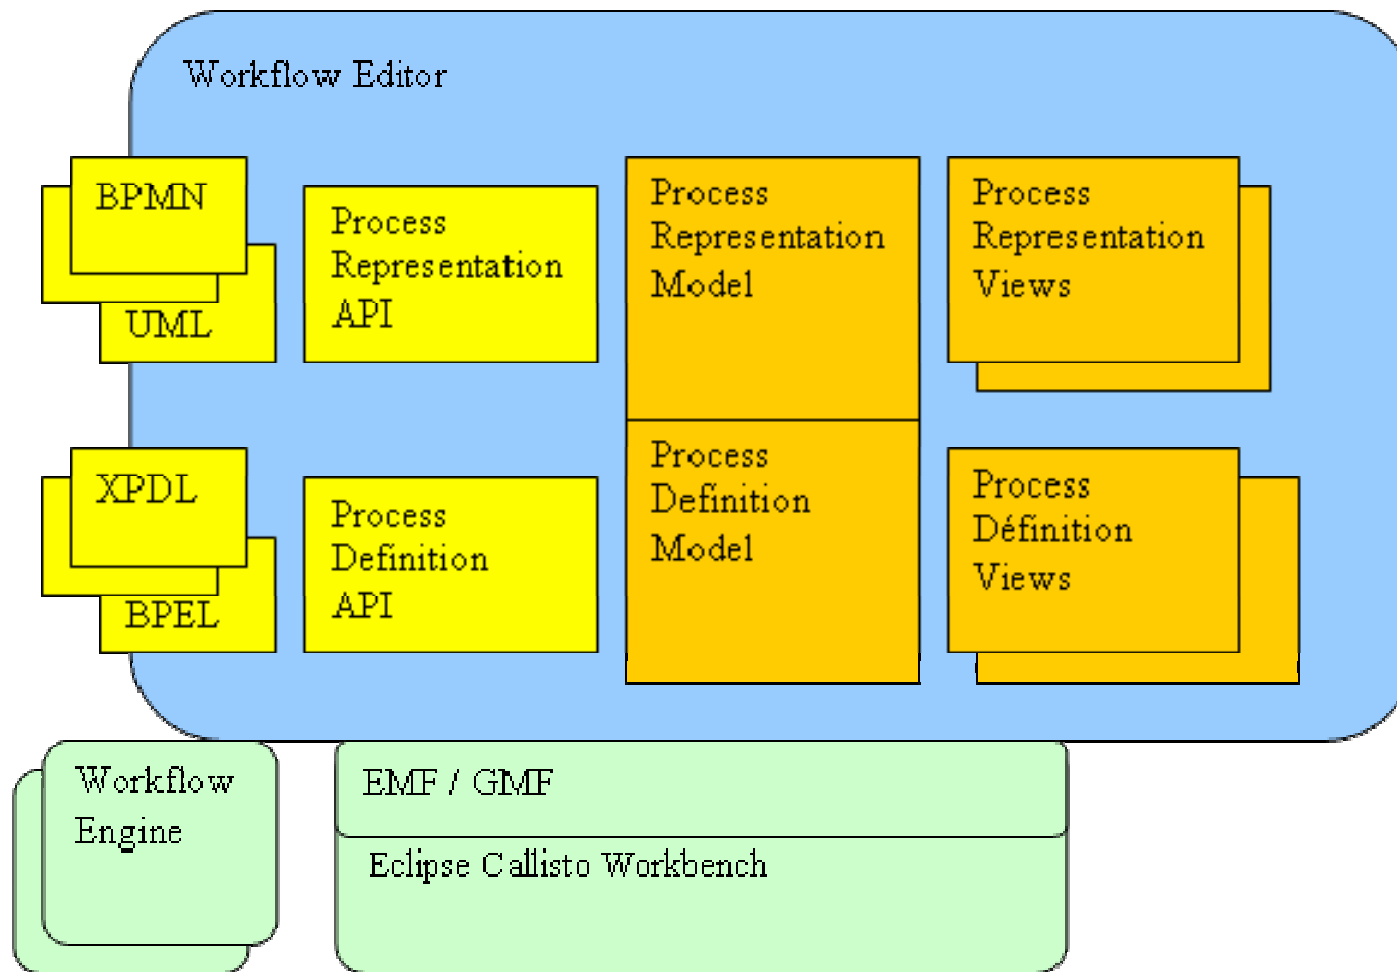

Description of the creation review

Participants:
- Bjorn Freeman-Benson (Eclipse board)
- Marc Dutoo and Florian Lautenbacher (JWT project lead)
- 3 persons from Tibco

Procedure:
- Questions about the proposal and the creation review slides
- very friendly atmosphere
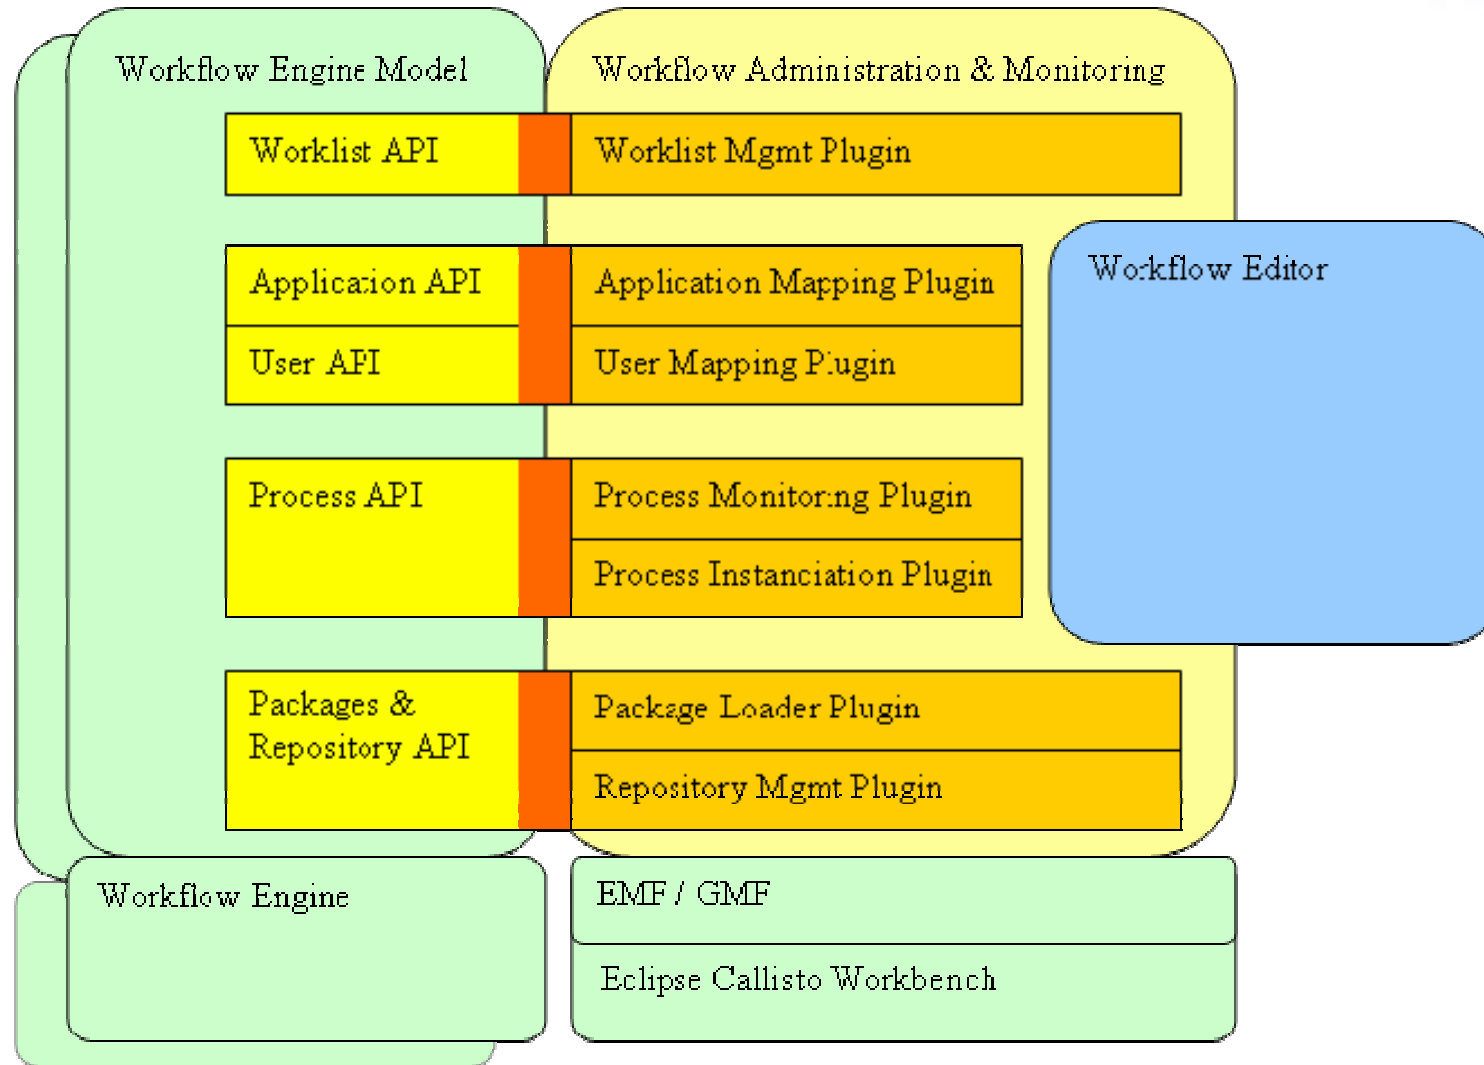

Summary about JWT - WE

Summary about JWT - Desktop

- The JWT Desktop is a tool for simulating the workflow / process before executing it on the process engine.

- Thought for end users without process engine.

- Uses adapters for often used applications:
    - MS Office, OpenOffice, Adobe, Internet browser, Google maps, etc.

- See the AgilPro simulator as an example

Summary about JWT - WAM

Overview about the KickOff meeting

- Short introduction to the KickOff meeting (these slides)

- Introduction to the project partners and participants of the KickOff meeting

- Description of projects / tools / contributions for JWT

- Next steps to be taken for AgilPro

Some rules for the KickOff meeting

- Please don't interrupt others!

- Accept that other persons have different views.

- Everybody has the right to speak and to tell his/her opinion.

- The project leaders are moderating this meeting, so please accept their interruptions if you are going too far from the topic discussed.

- Please stay with the agenda. Don't describe tools in the introduction session (too much) or thoughts about dissemination in the contribution part.
