Scout Apps

The screenshot displays the BSI CRM interface with several overlapping windows:

- BSI CRM Main Window:** Shows a navigation tree on the left with categories like Firmen, Personen, Projekte, Tickets, Kontakte, and Pendenzen. The main area displays a list of 'Personen' with 'Müller, Ralph (ECLIPSE FOUNDATION)' selected.
- Person Detail Window:** Shows fields for Name (Müller), Vorname (Ralph), Firma (ECLIPSE FOUNDATION), and Hauptbetreuer (Hoegger, Andreas (BSI BADE)). It also includes a photo of the person and checkboxes for 'Aktiv' and 'Unpersönlich'.
- Firma Detail Window:** Shows fields for Firmenkurzname (ECLIPSE FOUNDATION), Name (Eclipse Foundation Inc.), Firmen-Nr., and Hauptbetreuer (Hoegger, Andreas (BSI BADE)). It includes a logo for 'eclipse' and various detail fields like Region (Amerika), Branche (Informatik), Rating, and Sprache (Englisch). It also displays address and contact information.
- Telefon Window:** Shows a 'Telefonbuch' with tabs for 'Vergangene Anrufe' and 'Person'. It lists contact information for 'Müller, Ralph (ECLIPSE FOUNDATION)' with columns for Art, Adressentyp, and Telefon.

Buttons for 'Anrufen', 'Auflegen', 'Halten', and 'Weiterleiten' are visible at the bottom of the Telefon window. The Firma window has 'Ok' and 'Abbrechen' buttons. The Person window also has 'Ok' and 'Abbrechen' buttons.

Business Applications: A Pie Eclipse Scout (2h Tutorial)

Room: Bayshore East
[Andreas Hoegger](#) , [Matthias Zimmermann](#)

Date: 2010-03-24
Start Time: 10:00:00
End Time: 12:00:00

Making For Eclipse - Sponsored Talk

Tags: SOA / Tools / UI / RCP

In this tutorial participants will implement a fully featured framework. **Scout** is an Eclipse platform project in Proposal. Scout mainly focuses on increasing the efficiency of development based on Scout have a sound SOA (Service Oriented Architecture) clearly defined plugin structure, and provide OSGi compliance.

Part 1 – Client application model
Using the SDK (Scout Development Toolkit) an application

Part 2 – Remote services
Participants will then implement remote services to feed the application integrating webservice

Booth 23 !

```
String [] sa = new String [] {s1, s2, s3, s4, s5, s6};  
StringBuffer sb = new StringBuffer(sa[0]);
```

```
for(int i = 1; i < sa.length; i++)  
    if(i == 2 || i >= 2 << 1) sb.append(sa[i].substring(0, 2));  
    else sb.append(sa[i]);
```

```
for(int i: new int [] {sa[0].length(), sa[2].length(), sa[2].length()+sa.length})  
    sb.insert(i, " ");
```

```
System.out.println(sb.insert(2 << (2+1), " ").toString());
```
