-  [Lucas, Gwendal, Dr. \(K-AERT/A\)](#) (VW on behalf of VW GoA)
-  [Michael Scharfenberg](#) (ITK Engineering GmbH)
-  [Duong Quang, Tuan](#) (TÜV SÜD Auto Service GmbH)

Notes

Potential Qt Version Update to 5.15.0 or 6.0.1

Currently Qt 5.12 is used in the project. VW will check which version are approved internally and create an issue in GitLab for the corresponding Qt upgrade.

Current developments

PCM - in progress at ITK

BMW is currently preparing some commits containing Documentation, E2E Tests and further developments

OSC API - First draft will be committed by BMW and serve as basis for further discussion

Bicyclist model: implemented as native openPASS component (activity from VV Methoden)

A potential integration of this and other models depends on the future development of openPASS. The scenario engine and API currently have highest priority. The discussion concerning model integration into the repository will be postponed until the scenario API implementation has happened.

Upgrade to C++20

The AC is for an upgrade to C++20.

AOB

GitLab Wiki is now available. Tuan will create an entry containing a collection of links to our active websites.
